SUMMARY

Results-driven Software Developer with a BSc in Computer Science from the University of Sheffield and proven experience building high-performance web and mobile applications. Combines enterprise SaaS engineering at Softinn Solutions (Angular, C#) with modern full-stack shipping (React Native, Next.js, Supabase, PostgreSQL). Passionate about responsive architectures, fluid code-driven micro-interactions, and AI-accelerated workflows.

PROFESSIONAL EXPERIENCE

Front-End Developer, Softinn Solutions (Hotel SaaS Provider) – Malaysia Feb 2026 – present

- Spearheaded front-end development and feature optimization across a comprehensive suite of hospitality SaaS products (Booking Engine, PMS, CMS, and Hotel Portal) using Angular, Bootstrap, Metronic, and C# backend APIs.
- Engineered responsive, user-centric interfaces resolving complex hotel operational bottlenecks in an Agile Scrum environment.
- Collaborated closely with cross-functional teams to streamline guest reservation workflows and booking conversion funnels.

EDUCATION

University of Sheffield, BSc (Hons) in Computer Science – Sheffield, United Kingdom Sept 2022 – July 2025

- Class: Two Division One Honours (2:1)
- Relevant Modules: Advanced Algorithms, 3D Computer Graphics, Cybersecurity in Action, Internet of Things, Software Testing and Analysis, Robotics, Logic in Computer Science

INTEC Education College, A Levels in Cambridge International A Levels – Malaysia May 2020 – May 2022

- Grades: Computer Science (A), *Mathematics (A)*, Physics (A*), Further Mathematics (A)

Sekolah Sultan Alam Shah, High School Diploma in Malaysian Certificate of Education (SPM) – Putrajaya, Malaysia Jan 2015 – Sept 2019

- Grades: 6A+, 3A (including GCE O-Level English-1119)

TECHNICAL SKILLS

Programming Languages: TypeScript, JavaScript, Java, C#, C++, Ruby, Python, Embedded C, SQL, Haskell

Web & Mobile Development: React Native, Expo, Next.js, Angular, React, Tailwind CSS, Bootstrap, HTML5/CSS3, Three.js

Backend & Cloud: Node.js, Ruby on Rails, Supabase (Postgres & Realtime), Prisma, Firebase, Docker, Vercel

Testing & QA: Black-Box & White-Box Testing, Boundary Value Analysis, Test Automation, Jest

Hardware & IoT: ESP32, ESP32-S3, Arduino, NimBLE, PlatformIO, IMU Sensor Integration, Embedded Firmware

FEATURED PROJECTS

Wallo — Collaborative Real-Time Sticker Canvas

2026

React Native, Expo, Supabase Realtime, Zustand, Reanimated, RevenueCat

- Engineered a real-time collaborative mobile application featuring persistent digital canvases synchronized across devices via Supabase Realtime PostgreSQL feeds.
- Architected a GPU-accelerated in-tree Reanimated overlay router managing 26 modal archetypes at 60/120 FPS, replacing native OS dialogs to eliminate window inflation overhead.
- Implemented a True Center-Origin (0, 0) coordinate system for non-destructive canvas resizing (2K to 4K), dual-photo stickers, and two-dimensional tier monetization via RevenueCat.

PiYak — Gamified PWA Bodily Function Tracker

2026

Next.js 15, TypeScript, Clerk Auth, Prisma, PostgreSQL, Web Push

- Built a full-stack Progressive Web App with Next.js App Router, Clerk authentication, PostgreSQL via Prisma, and Vercel Cron jobs.
- Implemented offline service worker caching, Web Push notifications, a 18-badge achievement progression engine, and Spotify-Wrapped-style monthly telemetry.
- Established strict AGENTS.md rules codifying async auth middleware patterns, SEO route whitelisting, and IDOR protection.

Interactive Visualization for Graph Theory (Dissertation)

2024-09 – 2025-05

Java, Java Swing, GraphStream, OOP Design Patterns

- Designed and implemented a standalone desktop visualization tool in Java to simulate the k-Pebble Game and 1-Weisfeiler-Leman (1-WL) Graph Isomorphism algorithms.
- Engineered an interactive GUI utilizing Java Swing and GraphStream for dynamic graph rendering, demystifying abstract theoretical computer science concepts.

Software Hut — Client-Facing E-commerce Web Application

2024 – 2025

Ruby on Rails, PostgreSQL, Agile (Scrum/XP), Git

- Engineered and deployed a full-stack e-commerce web platform in an Agile Scrum team collaborating directly with an external commercial client.
- Managed end-to-end software delivery from Software Requirements Specification (SRS) to automated testing and deployment.

GeeyBoard — Couch-Potato BLE & IR Remote Controller

2024

ESP32-S3, C / C++, NimBLE, PlatformIO, Hardware IoT

- Custom ESP32-S3 BLE media controller and Infrared TV blaster with instant sloth-mode reconnect to navigate media and control TV power without leaving the couch.

PORTFOLIO

portfolio.jimiroi.com

- A professional portfolio showcasing engineering projects, technical experience, and interactive digital interfaces built with modern web technologies. Themes are custom made by me. Integrated with AI chatbot and Strava API.
